

Final Project – Part A: Design Assignment (Final Submission)

1. Project Brief

Purpose:

The purpose of this personal portfolio website is to showcase my technical skills, professional experience, project work, and full-stack development capabilities. It serves as an online professional identity where employers, clients, and collaborators can quickly understand my background and expertise.

Target Audience:

- Hiring managers and technical recruiters
- Software development teams
- Potential clients or collaborators
- Industry professionals in mobile, full-stack, and AI-powered systems

Goals:

- Present a clear and modern representation of my skills and experience
- Highlight my major projects including Lulugo (Flutter + Django full-stack system)
- Provide an easy way for users to explore About, Projects, and Contact
- Ensure a responsive, visually consistent, and accessible experience across desktop and mobile

2. High-Fidelity Designs (Figma Links)

Desktop Version: <https://www.figma.com/design/lfnNJFQZLeGF3oZC4SjLbm/Personal-Portfolio?node-id=1-456&t=zSuNxVynKbWSJ200-1>

Mobile Version: <https://www.figma.com/design/lfnNJFQZLeGF3oZC4SjLbm/Personal-Portfolio?node-id=1-542&t=zSuNxVynKbWSJ200-1>

Pages Included:

- About
- Projects
- Contact

All sections include full prototype interaction and responsive layouts.

3. UI Elements & Styles

Color Palette:

- **Primary Color:** #2C3E50 (Deep Blue-Gray – professional and modern)
- **Accent Color:** #4A90E2 (Bright Blue – highlights interactive elements)
- **Background:** #F5F7FA (Light Gray – clean and readable)
- **Text Color:** #1A1A1A (Dark Gray-Black – optimal contrast)

Typography:

- **Headings:** Inter Bold, 32–48px
- **Subheadings:** Inter Semi-Bold, 20–24px
- **Body Text:** Inter Regular, 16–18px

Buttons:

- **Primary:** Blue (#4A90E2) with white text, 8–12px border radius
- **Secondary:** Transparent button with deep blue-gray border
- **Hover:** Slight elevation + darker shade
- **Focus:** Thick blue focus ring for accessibility

Icons:

- Linear minimalist icons (Feather Icons)

Interactive Elements:

- Smooth hover transitions
- Clear focus indicators for keyboard navigation
- Card components for project previews

4. Accessibility Description

Contrast Checks:

- All color combinations follow WCAG AA accessibility standards.
- High contrast between text and background ensures readability.

Alt Text for Images:

- All project images include descriptive alt text (e.g., “Lulugo Mobile App UI Preview”). No profile photo is included in this portfolio

such as “Lulugo Mobile App UI Preview”.

Keyboard Navigation:

- Logical tab order
- Visible focus indicators on all buttons, links, and form inputs
- All interactive components are reachable through keyboard navigation

Readable Fonts:

- Body text minimum 16px
 - Line height 1.4–1.6
-

5. Design Rationale

- The design uses a **modern full-stack developer aesthetic** with clean structure, strong typography, and blue accent colors representing technology and reliability.
 - A card-based layout is used for the Projects page to visually separate each project.
 - The navigation layout is simple and consistent across devices to improve usability.
 - The responsive grid adapts from a multi-column desktop layout to a single-column mobile layout.
 - Accessibility considerations ensure the design is inclusive and readable.
 - The portfolio emphasizes clarity, professionalism, and easy content scanning for recruiters.
-

About Page Content

Name: Zexi Wang

Title: Full Stack Developer

This portfolio intentionally does **not** include a personal photo. The About page uses a clean text-first layout focusing on professional experience, education, and skills.

I am a full-stack development student and part-time software developer with hands-on experience building mobile apps, backend services, and AI-driven automation systems. I specialize in Flutter, Django, Python, API integrations, and scalable system design. With a background in computer engineering and multiple industry roles, I bring strong problem-solving abilities and full product-cycle experience.

Education

- **Nova Scotia Community College (NSCC)** – Postgraduate Degree, Computer Programming (2025–2026)
- **George Brown College** – Mobile Application Development & Strategy (2024–2025)
- **Hubei Normal University** – B.Eng. Communication Engineering / Computer & Info Engineering (2017–2021)

Experience

- **Technical Director** – **Lulugo Tech** (2025–Present)
- **Shopify App Developer** – **Superroute Inc.** (2024–Present)
- **Odoo Developer** – **Symminno** (2024–Present)
- **Odoo Backend Developer** – **Karrytech** (2021–2023)

Skills

- **Frontend:** Flutter, Dart, React
 - **Backend:** Django, Python, Node.js, Odoo
 - **Databases:** PostgreSQL, SQLite, MongoDB
 - **DevOps:** Docker, Linux Server, CI/CD
 - **Tools:** Git, Jira, Celery, Redis
 - **AI & APIs:** OpenAI Vision API, Google APIs (Geocoding, Maps, OR-Tools)
-

Projects Page Content

1. Lulugo – Intelligent Logistics Management Platform (Flutter + Django)

A full-stack cross-platform logistics application designed for drivers and logistics companies. Features include video OCR order import, AI-powered image recognition, route optimization using Google OR-Tools, multi-tenant architecture, real-time driver tracking, and role-based access control.

Key Features:

- AI-powered video and photo OCR for order creation (OpenAI Vision API)
- Real-time route optimization using TSP algorithm
- Multi-platform navigation (iOS MapKit + Android Google Maps)
- Real-time driver tracking and attendance system
- Multi-lingual support (English, Chinese, Spanish)
- Dockerized backend with Celery async tasks

My Contributions: Full-stack development, AI integration, backend architecture, database optimization, map navigation (iOS/Android), internationalization, containerized deployment.

2. ShopEase Courier Label Automation (Shopify App – Node.js + Polaris)

A Shopify app built for automating order imports, courier label generation, and shipping workflow optimization.

3. Smart Inventory Sync System (Odoo 16 + API Integrations)

Integrates multi-channel e-commerce platforms including Shopify, eBay, TikTok, and Walmart. Handles order import, inventory sync, file uploads, and automated label printing.
